SCOPE OF SERVICE

Customized Pest Management Program

Pest Pro is pleased to present this proposal for a comprehensive Integrated Pest Management program at Church of Eleven22's Orlando facility. Our program is designed around the specific needs of a church environment: high foot traffic, community gatherings, food-service areas, and the expectation of a clean, safe, and welcoming space for congregants.

We understand the property is currently in the final phase of renovation. Our service program is structured to begin during this transition period and continue seamlessly as the facility opens for regular use — no interruption, no restart fees.

No Disruption to Operations

Service visits are scheduled around your calendar. We work around staff, services, and events to ensure treatments are completed with zero disruption to the congregation or facility operations.
